Forecast for Thursday 26 May 2022

Weather: Dry with clear spells during the early hours, but cloud increasing and lowering with outbreaks of light drizzle developing around dawn. Remaining cloudy with occasional patchy drizzle throughout the morning, but with some drier interludes around midday before more persistent outbreaks of light rain arrive mid-afternoon. The rain will clear southwards by mid-evening leaving partly cloudy skies. Brisk winds for much of the day.

Chance of cloud-free hill tops above 600m: 90% at first deteriorating to 10% by dawn. Improving to 90% as rain clears late in the day.

Low cloud and visibility: Patchy cloud near 800m at first will increase and lower by dawn to cover many slopes above 400-500m. Cloud may lift to nearer 700m in drier interludes around midday, but lowering back to base 400m in afternoon rain. The cloud will lift and break as the rain clears mid-evening, leaving only patchy cloud around 700m. Visibility generally good beneath cloud during the early hours but becoming moderate or poor in any drizzle or rain, with views of nearby hills sometimes obscured. Visibility improving as the rain clears to become very good.
